

Dragon RS Approved for Use Case 4

We are proud to announce that our Triage Facility Provider Assurance Status has been updated to 'approved' by The Security Sub-Committee in line with SEC Section G12.7 of the Smart Energy Code (SEC).

The SEC is the agreement that defines the rights and obligations of energy suppliers, network operators and other relevant parties involved in the management of smart metering in the UK.

Dragon RS are the first service provider to be granted this status and are currently the only service provider to offer this service to customers.

This award comes after months of hard work and preparation by our team. We have undertaken a User Security Assessment as required by the Smart Energy Code (SEC) Section G12. As such, our triage facility must ensure that the Triage Tool and Triage System Interface used for Triage Activities have been assured under the CPA Build Standard as required by the CPA Security Characteristic Triage interface updates to GSME, ESME, & SAPC SCs and CPA Build Standard Extensions.

The addition of this service means that we can continue to provide a one-stop solution to our customers as well as the assurance of our commitment to quality services.

If you should require any further information, please contact Mick Young and Beth Bysouth at enquiries@dragonrs.com.

Mick Young, Managing Director

Providing a quality service is the best business plan
